November 26, 2010

Further to my email on November 19th regarding written submissions from intervenors, please note that any information that is provided prior to the Synapse final tariffs proposal on February 28, 2011 will not be considered to be part of the official public record on this matter. Accordingly, that information can be sent directly to Synapse for their use in developing proposed tariffs and does not necessarily need to be copied to other participants. Furthermore, any information that intervenors consider to be confidential should be clearly identified as such when submitted to Synapse.

The February 28th Synapse filing will form part of the official public record, as will any intervenor submissions after that date. Consequently, those submissions will need to conform with the Board's Regulatory Rules, including the process to be followed with respect to confidentiality.
