4 At line 15, page 6, NSPI states that it will work with customers to help ensure their
5 generator is sized to meet the expected annual consumption of the customer.

6 Assuming the customer is proposing to install a wind turbine with an annual capacity
7 factor of 30%, what is the maximum unit size permitted for each of the following:

8 a) A customer whose annual demand is 1500KW and whose annual consumption is
9 7800 Mwh.

10 b) A customer whose annual demand is 900KW and whose annual consumption is
11 1600Mwh.

14

15 At Lines 19 – 23 on page 9, NSPI discusses its proposed definition of “distribution
16 zone”. Please elaborate on the phrase “with an equitable allocation of geographically
17 dispersed net metering opportunities that protects the economic integrity of alternate
18 market arrangements under OATT”.

20 **Request IR-3**

21

22 With respect to Section 4, Payment for Annual Excess Self-Generation, please
23 provide the following for each rate class in which customers could potentially qualify
24 for net metering under the proposed Regulation 3.6.

25 a) The current energy charges per Kwh, showing the charges as approved by the
26 Board in NSPI’s last General Rate Application, and the AA, BA and DCRR
27 charges that currently apply (Please show those separately, rather than in
28 aggregate).

29 b) The current Demand Charge (\$/KW or \$/KVA)
