Request IR-01:

Reference 2019 DSM Resource Plan – Summary at page 16 of 23 EfficiencyOne states:

“The 2019 DSM resource plan also includes increased demand reduction through pilots developed by EfficiencyOne in collaboration with Nova Scotia Power.”

a) Please confirm the total amount ENS has included in the 2019 budget for demand reduction pilots.

b) With as much detail as possible, please describe the intended demand reduction pilots.

c) Please confirm which (if any) of the demand reduction pilot will reduce demand during Nova Scotia Power’s periods of highest demand in 2019.

Response IR-01:

a) EfficiencyOne has included a total of \$1.0M in the 2019 budget for demand reduction pilots and associated activities.

b) Please refer to EfficiencyOne’s response to UARB IR-15 a).

c) EfficiencyOne understands NS Power’s probable period of highest demand to be between 5PM and 7PM on a non-holiday weekday, during the months of December, January, and February. EfficiencyOne does not anticipate the pilots to be fully operational and able to affect system peak demands until December of 2019.

Request IR-02:

Please provide a new version of Table 1-2019 DSM Resource Plan Savings and Investment. In this new version, please remove spending related to the demand reduction pilots and allocate that spending to programs. Please hold the overall investment at \$34.1M.

Response IR-02:

Please refer to EfficiencyOne's response to NSUARB IR-15 c).
