Good afternoon -

NS Power has prepared an [evergreen IRP update](#), which can be accessed on the NS Power IPR website in the Document Library under the [2022 Evergreen IRP](#) page.

The material includes the following:

- Draft modeling results and key observations for a subset of the scenarios based on the original evergreen IRP assumptions
- Updates on significant planning environment changes since the original assumptions were finalized
- The updated evergreen IRP schedule outlining the remaining evergreen IRP process components and stakeholder engagement sessions/feedback periods

NS Power will be releasing the updated evergreen IRP assumptions in late January, followed by a stakeholder feedback period for both the evergreen IRP update material and the updated assumptions.

If there are any questions, please let us know.

Thank you,

NS Power IRP Team
