RE: A COMPLAINT by MARTIN AND WENDY TANNER (M12104)

Dear Mr. Singh,

The Riverport Electric Light Commission (REL C) received the Board's additional Information Requests in this Matter on May 9, which include the requirement to retain a professional engineer to prepare drawings and measurements with respect to the complaint. REL C is dependent on contracted resources to satisfy this requirement.

REL C has accordingly arranged for Strum Engineering, along with REL C powerline technicians and contracted traffic control, to visit the property at [REDACTED] to complete the required investigation. This investigation will take place at 9 AM on Tuesday, June 3rd. REL C therefore requests the Board's allowance to respond to the May 9th Information Requests not later than June 13th.

Further to the above, the estimated cost for this investigation is \$2,000. In the event that the investigation confirms that the current configuration meets the applicable safety clearance requirements, REL C requests the Board's confirmation that these costs could be recovered from the customer who initiated the complaint, as it would be inappropriate for other REL C customers to cover these costs.

In the event that the investigation confirms that the current configuration does not meet the applicable safety clearance requirements, immediate action will be taken to rectify this on June 3rd and will update the Board accordingly.

If the complainants have any concerns or would like to discuss anything herein, they are invited to reach out to me directly at dylan.heide@townofmahonebay.ca.

Thank you,

Dylan Heide, Town of Mahone Bay CAO
On Behalf of the Riverport Electric Light Commission
