NOVA SCOTIA ENERGY BOARD

To whom it may concern,

RE: M12412 - Nova Scotia Independent Energy System Operator (NSIESO) - Proposed expenditure and revenue requirements for test year ending March 31, 2026

SWEB Development is a developer, owner, and operator of renewable energy projects throughout Eastern Canada, headquartered in Halifax, Nova Scotia.

As a former and current Interconnection Customer with Nova Scotia Power, the proposed operating budget and revenue requirements for the new Nova Scotia Independent Energy System Operator is an important aspect relating to the efficiency, timeliness, and cost of completing interconnection related tasks, such as studies, processing requests, etc. Additionally, M10905 has identified a number of updates to be implemented to the new generator interconnection process. As a stakeholder of such processes, SWEB formally requests Intervenor Status in the above-mentioned Matter, as the operating budget could influence the efficacy and efficiency of the interconnection of all of SWEB's forthcoming renewable generators in the province, as well as the efficacy in implementing these new measures.

SWEB appreciates the opportunity and is excited to take part in this important Matter.

Please direct all communication concerning this proceeding to the undersigned.

Sincerely,

Mason Baker, P.Eng.
Director of Technical Services
