Ms. Wallace,

I am writing to formally add the attached screenshot directly into the record for Exhibit L-9. This document contains the absolute mathematical proof that Nova Scotia Power's billing architecture is a predatory fabrication.

As the right-hand margin of their own invoice explicitly states in black and white: "Your average cost of electricity during this period was \$4.30 per day before taxes."

Let us look at the mandatory math of their own stated metric:

1. A standard 30-day residential cycle at \$4.30 per day equals exactly \$129.00.
2. A standard 60-day bi-monthly billing period at \$4.30 per day equals exactly \$258.00.

Yet, on the left side of this exact same file, Nova Scotia Power is using unauthorized "ghost agreements" and unverified estimated adjustments to force an \$800.00 monthly payment matrix onto my account and demand a current billing payment of \$1,776.00.

This proves they are overcharging my family by nearly \$650.00 every single month above what their own daily consumption average states. For a utility to claim a consumer owes thousands of dollars while their own system logs that consumer's actual daily cost at \$4.30 is an outright manipulation of facts.

If my consumption truly justified their predatory demands, my daily cost metric would have to read between \$26.00 and \$59.00 per day. The \$4.30 figure is the unarguable proof that my actual usage is low, completely validating my home profile of LED lighting and a disconnected hot tub.

Their own document has completely exposed their fraud. I reiterate my demand that the Board immediately halt this predatory collection and issue an Immediate Emergency Stay Order.

Respectfully beyond frustrated,
Dave Lincoln
