Re: M12768 Extra Large Industrial Active Demand Control 2025 Report – Compliance Filing

Dear Ms. Henwood:

Nova Scotia Power Inc. (NS Power, Company) filed the Extra Large Industrial Active Demand Control (ELIADC) Tariff 2025 Report on March 26, 2026. The Company subsequently filed responses to Information Requests (IR) from Bates White (BW) on behalf of Nova Scotia Energy Board (NSEB, Board) Counsel, the Consumer Advocate, the Small Business Advocate (SBA), and the Industrial Group (IG) on May 8, 2026. Submissions were filed by BW, the SBA, and the IG on June 1, 2026, and the Company filed its Reply Submission on June 8, 2026.

On September 1, 2026, the Board issued its Decision in this matter. Among other findings, the Board directed NS Power to provide, by September 15, 2026, a firm date for delivery of the analysis associated with the more detailed quantification of actual load shifting benefits and costs. The Company provides this correspondence in compliance with that direction.

As part of the IR process, parties sought information regarding the status of work related to Recommendation XV-3 arising from the 2022-2023 Fuel Adjustment Mechanism (FAM) Audit. In its responses, NS Power explained the work underway to develop enhanced quantification of actual load shifting benefits and costs and advised that additional discussion would occur through the FAM Small Working Group (SWG) process.¹

Subsequently, in submissions, the SBA requested that NS Power commit to when it would provide the detailed quantification and update stakeholders on the status of

¹ Refer to the Company's responses to IG IR-11, IG IR-12, IG IR-13, and SBA IR-4.

the work,² while the IG requested that the Board impose a firm deadline for delivery of the analysis.³ In its Reply Submission, the Company confirmed that the work had resumed following restoration of the required systems and data and advised that it anticipated having data on the more detailed quantification of 2025 Active Demand Control load shifting benefits available for the Q2 2026 FAM SWG meeting.⁴

The Company confirms that this analysis was completed as a part of response to the 2022-2023 FAM Audit recommendation XV-3 and presented to stakeholders at the Q2 2026 FAM SWG meeting.

NS Power considers this directive to be satisfied.

Yours truly,

A handwritten signature in blue ink, appearing to read 'KM', with a stylized flourish at the end.
