To the Nova Scotia Energy Board,

I am writing to provide an update in Matter No. M12777.

Since filing my response, I have now received a new bill from Nova Scotia Power for the period February 12 to April 15, 2026. This bill shows new usage of 3,338 kWh over 62 days, with new charges of \$645.42, in addition to the previous balance already under appeal.

This is important because it shows that, even after the earlier reconciliation bill, electricity consumption at the property is still appearing unusually high. My concern remains that Nova Scotia Power has not identified or explained the practical source of this high usage within the home.

I wanted the Board to be aware of this additional bill, as it reinforces my concern that the underlying source of the consumption has still not been properly explained.

Sincerely,

Miguel Adam
