Re: M12783 – Regulation 3.6 – 2025 Net Metering Report

Dear Ms. Henwood:

On March 31, 2026, Nova Scotia Power Inc. (NS Power, Company) filed its Net Metering Report with the Nova Scotia Energy Board (NSEB, Board). On April 30, 2026, the Board issued Information Requests (IRs) to the Company, with responses due on May 21, 2026.

In preparing its responses, the Company has identified that NSEB IR-4 in this process requests analysis that is substantively similar to that requested in NSEB IR-6 in the Commercial Net Metering Program (M12782) proceeding. As a result, the Company is undertaking coordinated analysis across both proceedings to ensure consistency in approach, assumptions, and results. This requires additional time to conduct quality assurance on the results of the requested analysis.

In light of the above, NS Power respectfully requests that the deadline for filing responses to the Net Metering Report IRs be extended to May 26, 2026, aligning with the current filing date for IR responses in the Commercial Net Metering Program (M12782) proceeding.

Yours truly,

Karynne Munroe
Manager, Regulatory Affairs
