Re: M12786 – Nova Scotia Power Inc. 2025 Performance Standards Report

Dear Ms. Henwood:

Nova Scotia Power Inc. (NS Power) filed its 2025 Performance Standards Report on March 31, 2026. Following the filing, the Nova Scotia Energy Board issued the hearing order to set out the procedural steps in this matter.

NS Power filed its responses to information requests on May 29, 2026 and intervenors had until June 5, 2026 to seek leave to file evidence. The deadline for filing closing arguments is June 18, 2026 with reply comments due the following week.

In light of resource constraints and NS Power's commitments to ongoing information response and data response processes for both the 2027-2031 Performance Standards Review and the Five-Year Reliability Plan Review, NS Power requests a two-week extension to the deadlines for parties to file closing arguments and reply arguments. If NS Power is able to file its closing arguments before that time, it will do so.

Yours truly,

Jennifer Ross
Director, Regulatory Planning & Compliance
