I'm only agreeing to have my meter tested if I can have the analog meter back or a digital , I refuse the smart meter. The smart meters cause fires, and gave very inaccurate readings. No to the smart meter. Only reason I am changing my mind and agreeing to a digital is because my analog meter is not being read right and regardless of me sending in my meter readings they have yet to fix any wrong readings. I'm aware of all the rebates available , they don't make a difference when I'm getting 5000 dollar power bills!!. And yes. I turned my panel off, for the past 65 days, and used a generator yet got a 860 dollar power bill for that time.
