Request IR-1:

In Exhibit F-4, NS Power included Utility contact by Account screenshots, in particular Attachment 2, Page 9 of 9, the comment lines noted that a CR adjust of \$107.77 was made.

(a) Please provide the calculation that NS Power used to come up with \$107.77.

(b) Was the amount of the credit due to too many days being billed, or a difference in the number of days billed at the summer or regular rate?

(i) If it is based on too many days being billed, how did NS Power determine that, given the true-up was just the difference between the actual meter reads and what was previously billed?

(c) How did NS Power allocate the usage to summer and regular rates for the adjustment amount?

(d) The note stated 209 days at summer rate and 216 at regular rate. Was average daily usage used to allocate to these days, or did NS Power use past usage history to determine how much usage was allocated to the summer rate and regular rate?

Response IR-1:

(a) The adjustment calculation of \$107.77 was incorrect and the customer should have been credited \$91.29. See the calculations below.

2 (b) The amount of the credit was the difference in the number of days billed at the summer
3 rate or regular rate.
4
5 (c) The 209-day period associated with the summer rate was from April 6, 2025 to November
6 1, 2025 and the 216-day period associated with the regular rate was from November 1,
7 2025 to June 5, 2026.
8
9 (d) The average daily usage was used to allocate usage evenly across the number of days
10 associated with each rate. See below for the daily average usage calculation:

Request IR-2:

(a) Once the meters were reconnected to NS Power's system, how many days of daily usage were uploaded to NS Power's system/stored in the meter?

(b) Please provide as many days of daily usage, going back to 2021, that NS Power has for the customer's account, including before the cyber attack.

Response IR-2:

(a) NS Power has daily usage from February 22, 2026, onward, post-cyber attack stored in the meter.

(b) Please refer to Attachment 1 for daily usage detail.

Request IR-3:

In the appellant's reply submission, NS Power communication/Billing n), the appellant noted consumption of 19,338 kWhs (2762/billing cycle) for 2021.

(a) Please confirm that this isn't the 2021 consumption, but rather 7 billing cycles dating from the April 2025 actual meter read to the June 2026 billing cycle.

(b) Please provide the calculation that NS Power used to show that actual consumption was 19,338 kWh noted by the appellant.

(c) What was the same usage for the same billing periods (7 cycles) since June 2021?

Response IR-3:

(a) The consumption of 19,338 kWh was for the billing cycles dating from the true meter read on April 6, 2025 to the true meter read on June 5, 2026.

(b)	Bill date	Energy used
	June 2026	1,276 kWh
	April 2026	7,055 kWh

Request IR-4:

What is NS Power's policy for estimating bills/usage for a billing period?

(a) Are estimates based on an average for the same billing period over a set number of years, or based on the previous year for the same period?

(b) If several years (two or more) is the policy, why was this customer's estimate set based on just the previous year?

Response IR-4:

(a) For domestic bi-monthly customers, the estimation code starts at the same month for the previous year and aggregates usage and days going forward from that point for the same season. The aggregation of historical billed usage and days does not include estimations.

(b) N/A
